E. Method and Limitations

Area	Details
Method	The report was prepared from web-visible extracts of 91mobiles pages. The main list pages were used to compile the latest and upcoming phone tables. Individual product pages were used for four expanded spec sheets.
Scope	This is a large but not exhaustive dump. The 91mobiles latest page reports 137 latest phones and the upcoming page reports 50 upcoming phones. This PDF captures the most visible rows returned in the browsed page extracts and selected detail pages.
Data freshness	Phone pricing, availability, expected dates, and specifications can change quickly. Treat all values as captured-page values as of 8 May 2026.
Copyright and ethics	This report extracts factual specifications for study/project use and includes source attribution. Do not republish full copyrighted reviews or website content without permission.
Possible next step	For a production scraper, use a crawler that respects robots.txt and terms of service, store rows in CSV/SQLite, and regenerate the PDF automatically with source timestamps.
